ECLAP goals

- **Content Aggregation**
  - Providing content towards Europeana
- **Content Distribution** toward several channels
  - For education and entertainment
  - to PC/Mac/Linux; mobile: iOS, android, WP7
- **Networking and Social Services**
  - User groups, discussion, forums, mailing lists
  - Connection with social network for share and contact gathering
  - Events setup and management, mailing notifications

ECLAP content kinds

- **General**
  - blog, web pages, events, help, forum, wiki, etc..
- **Content**
  - audio, video, images, doc, animations, ebook/epub, mpeg-21, smil, html, doc, docx, ppt, pptx, zip, web pages, etc..
- **Aggregations**
  - Collections, playlists, courses, annotations
- **Enrichment**
  - Tags, taxonomy, comments, translations
- **Networking Group**
  - users, groups, friendships, behavior
  - discussions: forum, comments, blog, …
  - groups and users' web pages
- **Workflow**

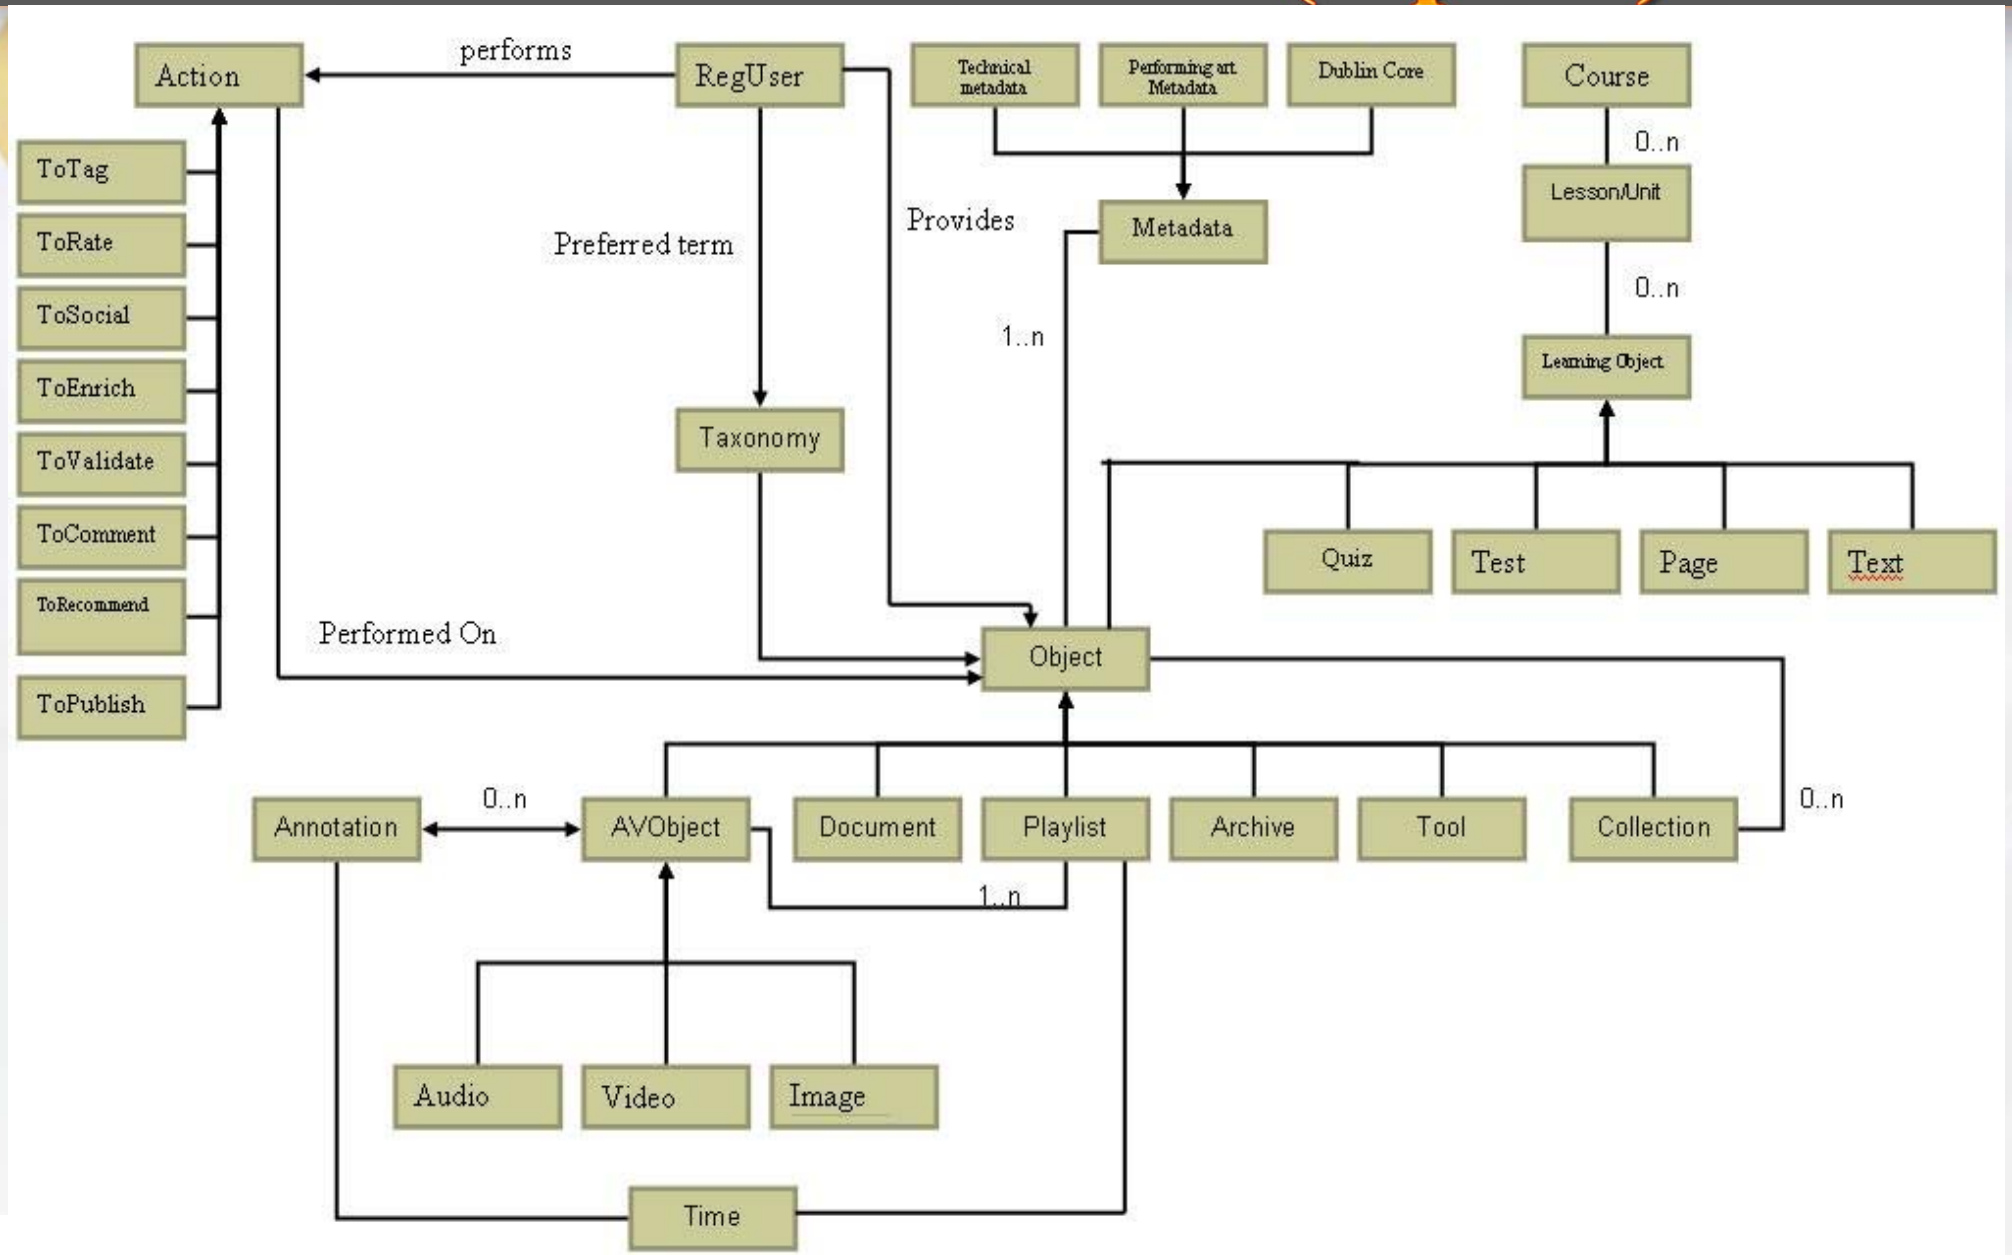
Semantic Modeling/Reasoning

- **Multiple heterogeneous kind**
- **Semantic Model for content:**
  - Multilingual Metadata: General, Classification, Technical, Performing Arts, Workflow
  - Aggregations: playlists, collections, courses, ..
  - Enrichments: comments, annotations, tags, ..
- **User Modeling, user behavior analysis and profiling**
  - Integration of static and dynamic profiling: *action, friendships, featured, preferred, collections, commented, votes, etc. etc.*
- **Semantic reasoning:**
  - Exploiting semantic model of content and user profiling for analyzing and producing suggestions: U→U, O→U, O→O, etc.
- **Automated and scalable back office, content processing**
  - Content file ingestion, repurposing for any device, managing media and cross media content: any content/format kind, >500 file formats
  - Executing semantic computing algorithms (see IEEE Multimedia)

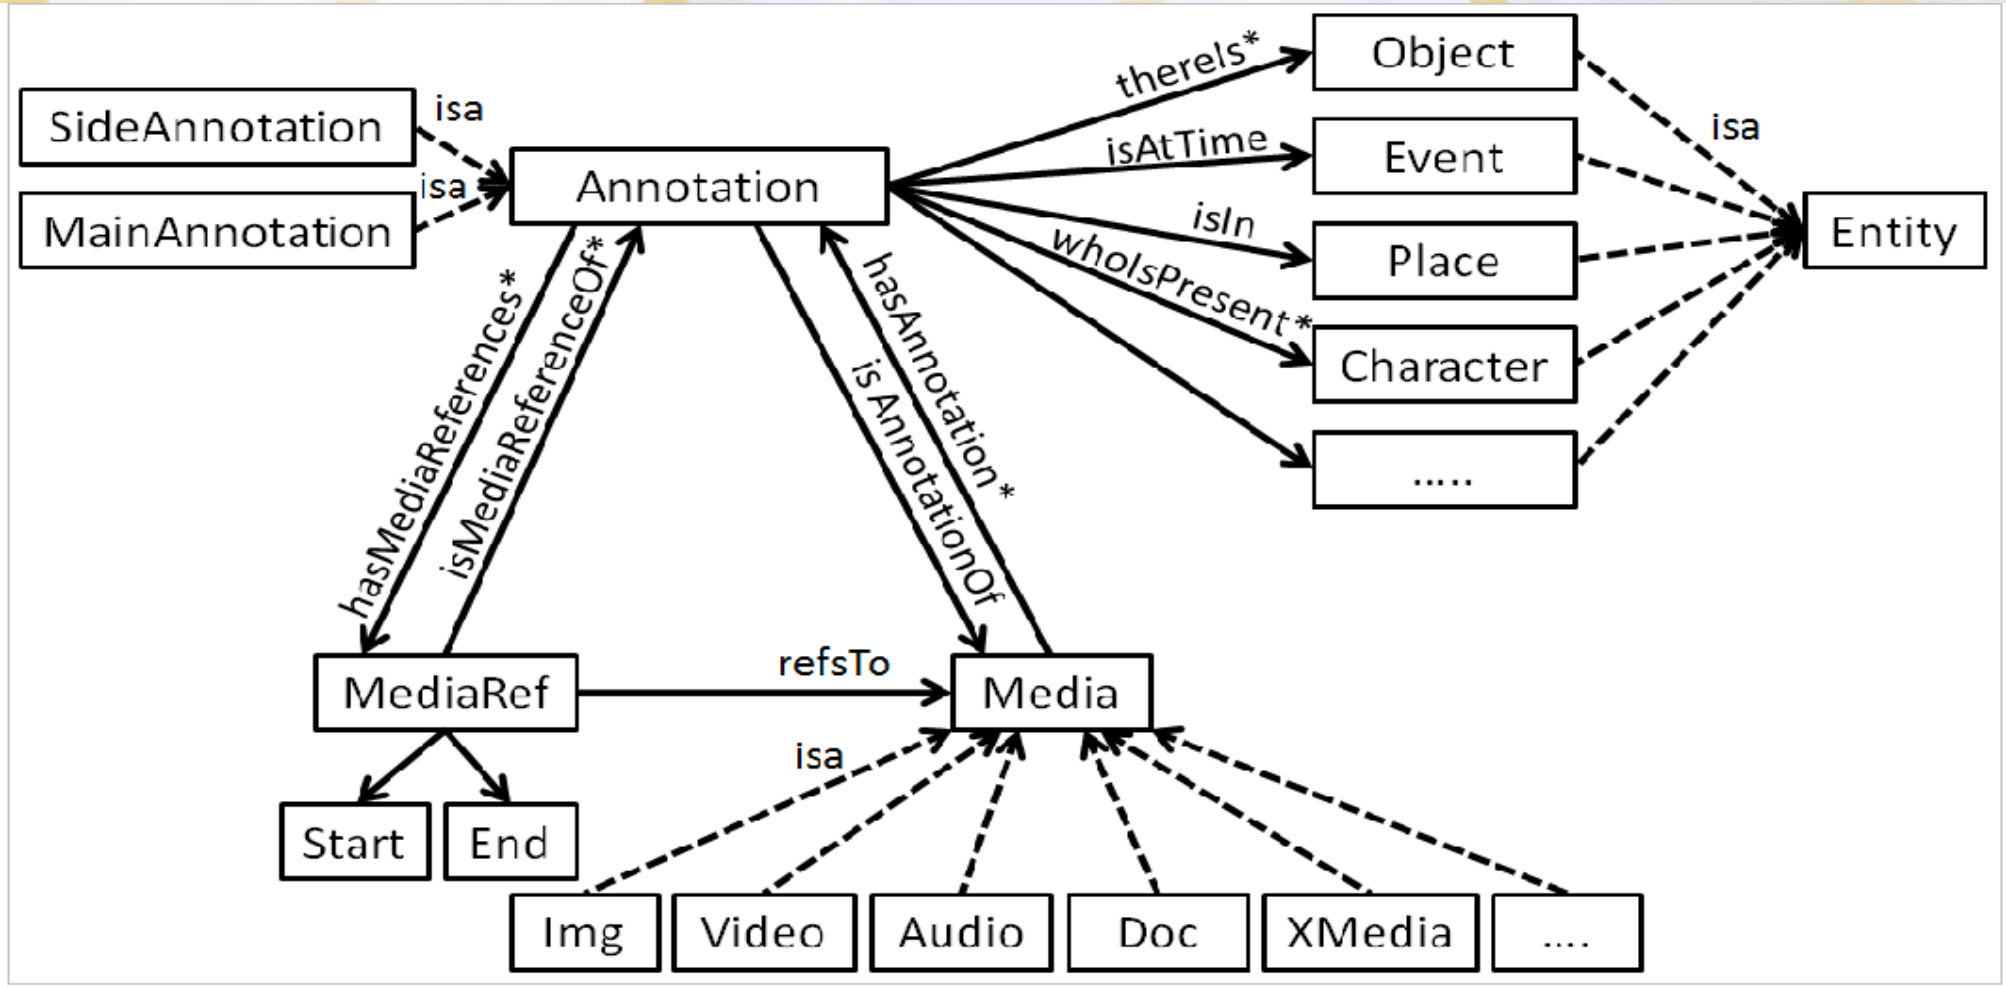
ECLAP Metadata Mapping

	ECLAP semantic model	Europeana ESE	Europeana EDM
Dublin Core	100% (and multilingual)	100%	100% (multilingual)
Performing art metadata	>59 additional fields	0	*Work by DSI is in progress for the mapping*
Technical metadata of different kind	>25 technical information	0	*Work by DSI is in progress for the mapping*
Aggregation information	About 4 (playlists, collection, sync, courses, etc.)	0	*Work by DSI is in progress for the mapping*
workflow	Different workflows	0	--
Right and licensing	Europeana.rights and use licensing, license url, etc.	Only Europeana.rights element	*Work by DSI is in progress for the mapping*
total	Much more with respect to ESE	Mapping at 100%	To be assessed

Semantic Model (a part)



MyStoryPlayer Semantic Model



Search capabilities

- **General frontal search**
  - Large range of content kind, any language, etc.
  - Possible activation of the deep search
  - Results: faceted and sorted
- **Specific / Advanced search capabilities**
  - per language, per provider, etc.
  - And/Or composition of a large range of metadata
  - MyStoryPlayer: Annotations and Experiences
  - Filtering content per workflow metadata
  - Groups Search
  - User Search
  - Search and browse on Mobile

Indirect Capabilities

- **Offered Browsing List**
  - **General Lists:** most accessed, last uploaded, highly rated, featured, …
  - **Your Lists:** your content, content of your friends, your playlists, your collections, your preferred, suggested objects, your featured, …..
  - Your groups, your friends, etc…
- **Browsing via**
  - Taxonomy/SKOS
  - Groups and channels
- **Subscriptions profiled:**
  - Newsletters, notifications

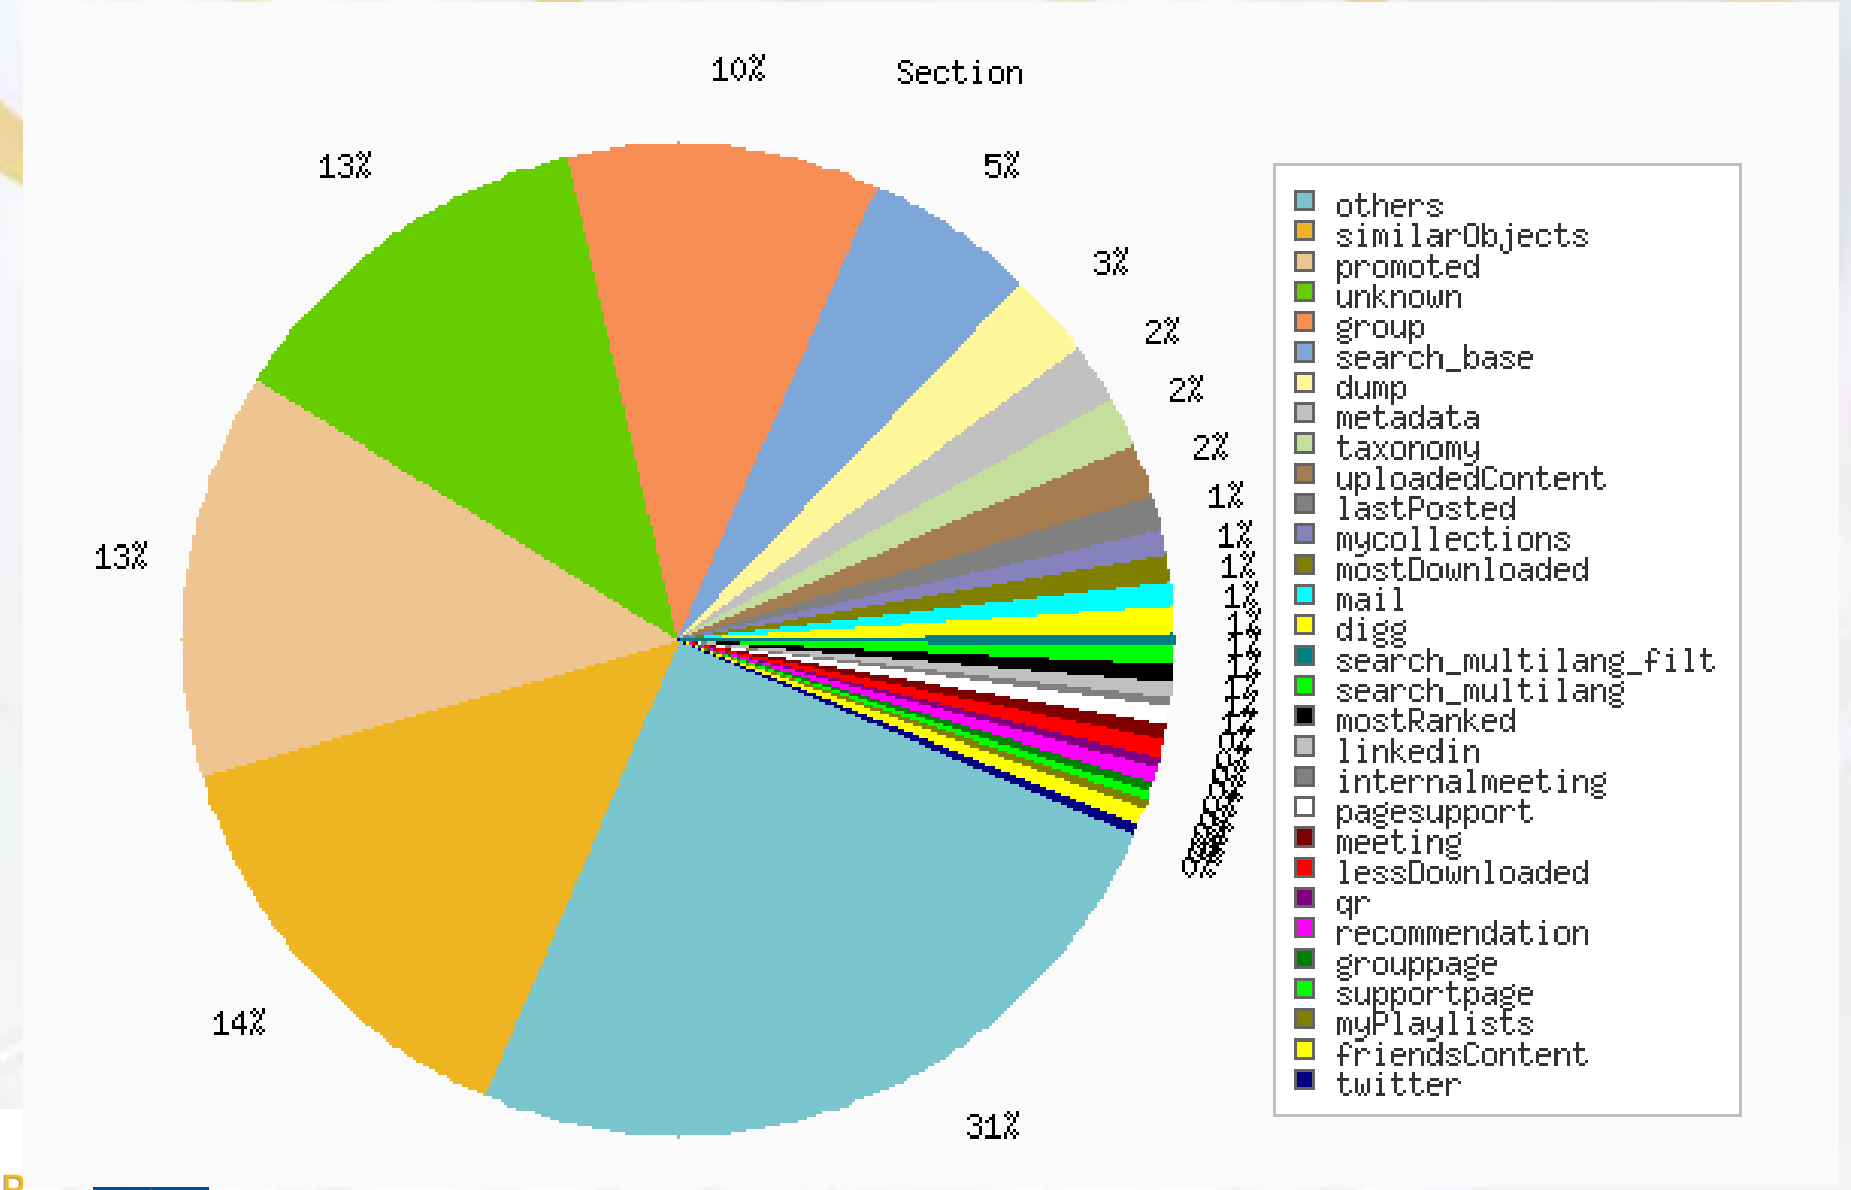
Assessment and validation

- Logs accesses: downloads and play
- Logs queries and appreciation
- Logs user actions, browsing, …
- Contextualized Pop Up questionnaire to collect user view
- Specific assessment and validation sessions with set of users
- Access to all above details at the administrator level

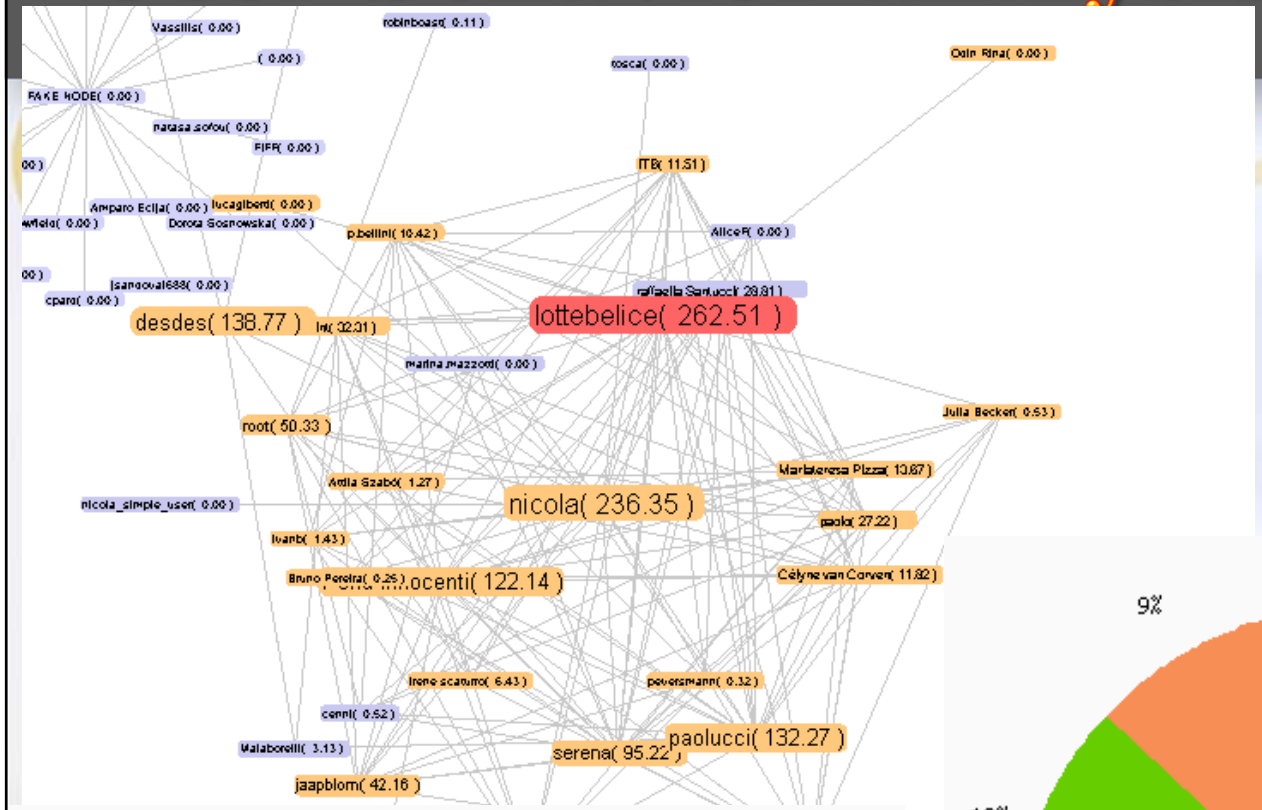
- Access to statistical analysis for Group Coordinator:
  - Content Upload and Access
  - Content Enrichment
  - Social promotion, Networking
- Access to statistical analysis for regular registered user
  - Content Upload and Access
  - Content Enrichment
  - Social promotion, Networking

Example: last month statistics on accesses

Distribution of Content Access per Section (downloads)



User behavior analysis



- User profile analysis
- Users' actions
- Users' paths
- Reactions wrt query results
