

Content Organizer

Personal Content Management

What is the problem

Users connected to social enabled portals for e-learning, best practice work, collaborative work need to be capable to download and collect a large range of content (from video to PDF, ebook, audio, images, collection, playlists, courses, etc.) from their working sites. The downloaded content should be locally available for:

- ✓ search and browse on the basis of the content classification, portal, qualified taxonomy (margining those of the several portals), etc.
- ✓ personal classification with personal tags, multiple classifications
- ✓ easy access and identification via QR codes, GPS coordinates

Moreover, the users also need to get in contact with other users, chat with them and exchange information and profiles. This large set of information has to be saved in the cloud to make it accessible from other devices for the same user, thus saving time on the move.

How it has been solved

The Content Organizer is a tool that allows you to access download and organize content from Enabled portals into your mobile device. Once the content is downloaded into your mobile, you can manage it as your personal collection of content in the mobile device, search content, browse, get information, etc.

Content Organizer is a free of charge application that can be downloaded from Apple Store, Windows Market and accessed as direct application for Android.

Major features are related to **content**:

- ✓ Multilingual user interface
- ✓ Download and play (video, audio, pdf, epub, ebook, images, MPEG-21, HTML5, collections, playlists, courses)
- ✓ Connected to multiple portals and social networks
- ✓ Multilingual metadata search and access, including: advanced metadata, GPS, taxonomy, groups, tags, IPR model and licensing, etc.
- ✓ Navigation: via taxonomies, groups of the portals, personal tagging (insertion and navigation)
- ✓ Content grab and upload to portals, user generated content
- ✓ Content firing at GPS locations defined by the content provider
- ✓ Direct content download via QR codes directly grabbed into the application
- ✓ Suggestion and shortcut: most viewed, last used, alphabetical, for kind, ...
- ✓ Rendering on beamer projector also on iPad1 and iPad2

And to **Users**:

- ✓ Networking via direct user connection and chat, file exchange
- ✓ User engagement at events in push managing fast questionnaires, opinions, timed quiz, etc. (White Rabbit)
- ✓ Simplified connection to registered portals
- ✓ Networking via multiportal connection, group and forums

Among the versions iPhone, iPad, iPod, Android and Windows Phone 7 some differences are available. The most powerful version is available for iOS:

- ✓ iOS Apple Store: <http://itunes.apple.com/us/app/content-organizer-lite/id469941163?ls=1&mt=8>

- ✓ Windows Phone 7:

- Italian <http://www.windowsphone.com/it-IT/apps/ef4c898d-206a-47b2-99f9-11b0d47b6b36>
- English <http://www.windowsphone.com/en-US/apps/ef4c898d-206a-47b2-99f9-11b0d47b6b36>

- ✓ Android: <http://www.eclap.eu/android/Content-Organizer-Beta-Android-March-2012-v0-1.apk>

Download the app

iOS App Store

Windows Phone ITA

Windows Phone ENG

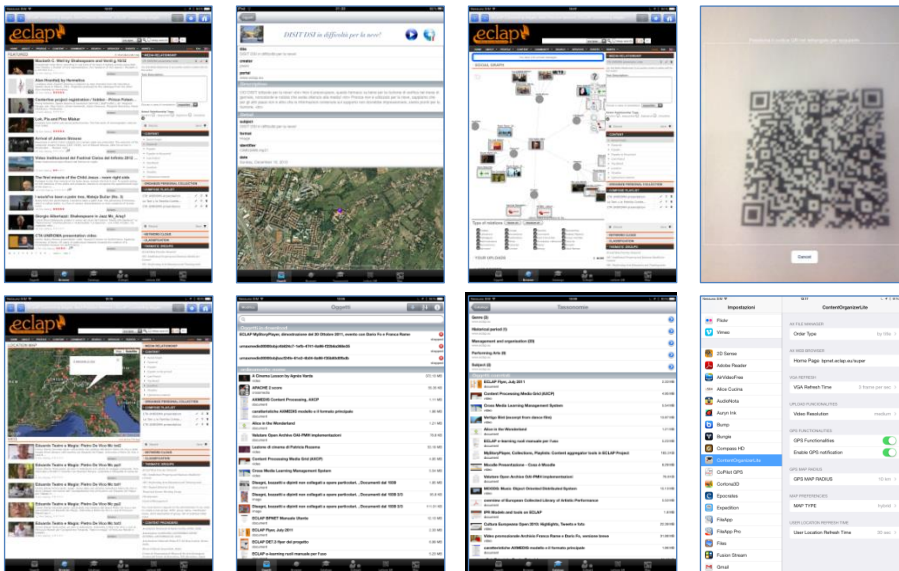

Android

How to work with

If you are interested on Content Organizer you can:

- ✓ exploit the general purpose version available on the mentioned mobile stores. In this case, your portal can be easily adapted to be compliant with the Content Organizer and could be registered on the main list of portals. This solution is free of charge, please contact us, modules for PHP and other languages are available;
- ✓ request a customized version with the features you like and the graphic layout you prefer;

Custom derived versions of Content Organiser can be produced by scripting exploiting its features for creating specific applications as: lessons, guides for museums, overviews, promotional content collections, etc.
